

myRekod — User Manual

For employees and administrators

English · Easy to follow

Getting started

Welcome to **myRekod**.

This short page helps everyone open the app and understand the basics.

What is myRekod?

myRekod helps your company manage:

- Clock in and clock out
- Leave requests
- Expense claims
- Payslips
- Company announcements

Employees use the staff screens.

Administrators (HR / managers) use the admin dashboard.

How to open the app

Option A — Browser link

1. Open the website link your company gave you
(example: `https://attendance-app-peach-rho.vercel.app`)
2. Sign in with your account

Option B — Add to Home Screen (recommended on iPhone)

1. Open the link in **Safari**
 2. Tap **Share**
 3. Tap **Add to Home Screen**
 4. Open myRekod from your home screen like a normal app
-

Create an account (new users)

1. On the login screen, tap **Create an account**
 2. Fill in:
 - **Email** — use an email you can open
 - **Username** — at least 3 characters (spaces OK, e.g. `PUTRA MUHAIMIN`)
 - **Password** — at least 6 characters
 - **Confirm password**
 3. Tap **Create account**
 4. If asked to confirm email, check your inbox, then sign in
-

Sign in

1. Enter your **username or email**
 2. Enter your **password**
 3. Tap **Sign in**
-

Forgot password

1. On login, tap **Forgot password?**
2. Enter your account **email**
3. Tap **Send reset email**
4. Open the email and tap the link
5. Enter a **new password** twice and confirm
6. Sign in again with the new password

*Tip: Always request a **new** reset email if an old link expired.*

Which menu do I see?

Employee bottom tabs

Tab	Purpose
Home	Today's summary and shortcuts
Clock (centre)	Clock in / clock out
Profile	Your details, password, help

Admin bottom tabs

Tab	Purpose
Home	Dashboard and management shortcuts
Attendance	Who clocked in / out
Employees	Team list and profiles

If you should be an admin but see the employee app, ask your developer/HR to set your role to `admin` in the database.

Need help?

- In the app: **Help & support**
 - Phone: **+60 11-7078 7014**
 - Hours: Monday–Friday, 9:00–18:00 Malaysia Time
-

Employee guide

This guide is for **staff members**.

It explains everyday tasks in simple steps.

1. Home dashboard

After you sign in, you land on **Home**.

Here you can usually:

- See today's greeting and date
- See if you are clocked in, on leave, or done for the day
- Open shortcuts such as:
 - Leave
 - Claims
 - Payslips / payroll history
 - Announcements
 - Attendance history
 - Help

Pull down on the screen to **refresh**.

2. Clock in and clock out

Use the centre **Clock** tab on the bottom bar.

Clock in

1. Tap **Clock**
2. Tap **Clock In**
3. Confirm
4. Wait until you see a success message

If workplace location is ON

Your company may require you to be at the office.

- Allow **location / GPS** when the phone asks
- Stay inside the allowed radius (example: 100 metres)
- The screen may show:
 - **In range**, or
 - How many metres away you are

If you are too far away, move closer and try again.

Clock out

1. Tap **Clock**

2. Tap **Clock Out**
3. Confirm

Location is **not** required for clock out.

Good to know

- You normally clock in **once per day**
 - If you have **approved leave** for today, clock-in may be blocked
 - You can view past records from attendance history / log shortcuts
-

3. Leave

Apply for leave

1. From **Home**, open **Leave**
2. Start a new leave request
3. Choose:
 - Leave type
 - Start and end dates
 - Reason
4. Attach a file if needed
(example: medical certificate / MC for sick leave)
5. Submit

After you submit

- Status is usually **pending** until a manager/admin reviews it
 - You will see when it becomes **approved** or **rejected**
 - Approved leave for today can block clock-in
-

4. Claims (expense claims)

Claims are in **Malaysian Ringgit (MYR / RM)** only.

Submit a claim

1. From **Home**, open **Claims**
2. Start a new claim
3. Fill in:
 - Title
 - Category
 - Amount (RM)
 - Date of expense
 - Description if needed
4. Upload receipt(s) or supporting files
5. Submit

Track your claim

Open **Claims** again to see whether it is:

- Pending

- Approved
 - Rejected
-

5. Payslips

1. From **Home**, open payroll / payslips history
2. Tap a payslip to view details
3. Contact HR if something looks wrong

If the list is empty, HR may not have published a paid/approved payroll run yet.

6. Announcements

1. From **Home**, open **Announcements**
 2. Read company posts
 3. A badge may appear when there are unread items
-

7. Profile

Open the **Profile** tab.

You can usually:

- View / update personal details you are allowed to edit
- Save changes
- Open **Change password**
- Open **Help & support**
- Sign out

Change password (while signed in)

1. Profile → **Change password**
2. Enter a new password and confirm it
3. Save

Account email / username

These are set when you register.

If you need them changed, contact HR or your system admin.

8. Help & support

1. Open **Help & support** from Home or Profile
2. Read common questions
3. Call support if needed:

Contact	Detail
Phone	+60 11-7078 7014
Hours	Mon–Fri, 9:00–18:00 MYT

You can also copy diagnostics from Help and share them when you contact support.

9. Daily checklist for employees

1. Arrive at work
 2. Open myRekod → **Clock** → **Clock In** (allow location if asked)
 3. Work as usual
 4. Before leaving → **Clock Out**
 5. Use Leave / Claims when needed
 6. Check Announcements when a badge appears

Admin guide

This guide is for HR / administrators.

Use it to manage staff, attendance, leave, claims, payroll, and workplace location.

1. Admin Home

After login (with an admin account), you see the **admin dashboard**.

Today's pulse

Quick numbers such as:

- Team size
- Clocked in
- Clocked out
- Items needing action (leave / claims)

Shortcuts

From Home you can open:

Shortcut	What you do there
Leave hub	Review leave requests
Payroll	Salaries, runs, payslips
Attendance	Who clocked in/out (also a bottom tab)
Team	Employee list
Claims	Approve expense claims
Announcements	Post company news

Workplace location	Set office GPS + clock-in radius
Help & support	FAQs and support phone

Pull down to refresh.

2. Employees (team)

1. Open the **Employees** bottom tab (or Team from Home)
2. Find and tap an employee
3. Edit details such as:
 - Full name, phone, address
 - Role (Employee / Admin)
 - Job title, department, employee ID
 - Employment start date
 - EPF / SOCSO / bank
 - Education and emergency contact
 - Annual leave override (optional)
4. Tap **Save changes**

Important

- **Email** and **username** are set at registration and are not edited on this screen
 - To make someone an admin, set **Role** to Admin and save (or ask a developer to update `public.users.role` in Supabase)
 - **Nobody can view a user's real password** (passwords are stored hashed). In an emergency you can only **set a new temporary password** (see below).
-

2b. Emergency: set a user's password (admin / developer)

Use this when:

- Staff cannot sign in and **Forgot password** fails
- You see **email rate limit exceeded / 429 Too Many Requests**
- Supabase Dashboard has **Send password recovery** but no simple "Update password" button

Preferred when email works

1. Staff use Login → **Forgot password?**
2. Open the **newest** email link in the **same browser** they use for the app
3. Set a new password → sign in

If many reset emails were sent recently, Supabase's built-in mail allows only about **2 emails per hour for the whole project**. Wait up to **1 hour**, then try **once**. Changing Wi-Fi or email address does not always clear this limit.

Emergency: set password with Admin API (no email)

Needs a **developer or project owner** with access to the Supabase **service_role** key.

1. Supabase Dashboard → **Authentication** → **Users** → open the user → copy **UID**
2. Supabase → **Project Settings** → **API** → copy `service_role` (secret — never put this in the Flutter app or git)

3. Project ref / ID is the subdomain of your API URL, e.g. `dxsnvtiwqmexarqjbwdd` from `https://dxsnvtiwqmexarqjbwdd.supabase.co`
4. On a trusted PC, open **PowerShell** and run (replace the three placeholders):

```
$PROJECT = "YOUR_PROJECT_REF"
$SERVICE_ROLE = "YOUR_SERVICE_ROLE_KEY"
$USER_ID = "USER_UID_FROM_DASHBOARD"
$NEW_PASSWORD = "TempPass123!"

Invoke-RestMethod `
  -Method PUT `
  -Uri "https://$PROJECT.supabase.co/auth/v1/admin/users/$USER_ID" `
  -Headers @{
    apikey = $SERVICE_ROLE
    Authorization = "Bearer $SERVICE_ROLE"
    "Content-Type" = "application/json"
  } `
  -Body (@{ password = $NEW_PASSWORD } | ConvertTo-Json)
```

5. Tell the staff the temporary password privately
6. They sign in → **Profile** → **Change password** to something only they know

Security rules

- Never share or commit the **service_role** key
- If the key was pasted into chat, email, or a ticket → **rotate it** in Project Settings → API
- Prefer a strong temporary password; require staff to change it after login
- Do **not** delete the Auth user to “reset” them — that breaks their linked HR record

Longer-term (recommended for production)

Ask a developer to configure **Custom SMTP** in Supabase so password emails are not stuck on the free ~2/hour limit. See the developer deploy guide.

3. Attendance

1. Open the **Attendance** bottom tab
2. Review who clocked in / out today
3. Use calendar or monthly views if available for deeper checks

Employees create their own punches from the Clock tab.

Admins mainly monitor and investigate.

4. Leave management

1. Home → **Leave hub**
2. Choose how you want to review leave (pending list and/or by employee)
3. Open a request
4. **Approve** or **Reject**
5. Add a clear reason when rejecting

Employees see the new status in their Leave section.

5. Claims management

1. Home → **Claims**
 2. Open a pending claim
 3. Check:
 - Amount (MYR)
 - Category
 - Receipts / attachments
 4. Approve or reject
-

6. Payroll

1. Home → **Payroll**
2. Typical flow:

A. Salary settings

- Set or edit employee salary components
- Choose EPF category where needed

B. Statutory settings

- Review EPF / SOCSO / EIS related settings used by payroll

C. Payroll runs

1. Create or open a payroll run for a period
2. Generate / review employee items
3. Check amounts
4. Approve / mark paid according to your process

D. Payslips

- After a run is approved/paid, employees can view payslips in their app

If employees see no payslips, check that a run exists and is in the right status.

7. Announcements

1. Home → **Announcements**
 2. Create a title and message
 3. Publish
 4. Staff see it under Announcements on their Home screen
-

8. Workplace location (very important)

This sets **one office location** for clock-in.

What it does

- Staff must be inside your chosen radius to **clock in**
- **Clock out** is not checked
- The saved pin does **not** follow the admin phone home

How to set it

1. Home → **Workplace location**
2. Enter a workplace name (example: `HQ Office`)
3. Set the map pin using either:
 - **Pick on OpenStreetMap** → tap the office on the map → confirm, or
 - **Use my current location** while standing at the real office
4. Set **Radius (metres)**
Example: `100`
Allowed roughly **20–5000**
5. Turn **Enforce on clock-in ON**
6. Tap **Save workplace**

Tips

Tip	Why
Stand at the real office when using GPS	Saves the correct pin
Start with 100 m	Good balance for GPS accuracy
Increase radius if staff near the door fail often	Indoor GPS can be slightly off
Turn enforce OFF only for testing	Otherwise staff can clock in from anywhere

Map preview

- The teal circle shows the allowed clock-in area
 - Tap the preview or **Pick on OpenStreetMap** to edit the pin
-

9. Help & support

Same Help screen as employees, with admin tips.

Contact	Detail
Phone	+60 11-7078 7014
Hours	Mon–Fri, 9:00–18:00 MYT

10. Admin daily checklist

1. Open Home → check pulse numbers
 2. Review pending **Leave** and **Claims**
 3. Check **Attendance** if needed
 4. Post an **Announcement** when there is company news
 5. Keep **Workplace location** accurate if the office moves
 6. Run **Payroll** on your company schedule
-

Troubleshooting

Use this page when something does not work.
Try the steps in order.

Login and account

I cannot create an account

1. Check email and password are valid
2. Try a username that is not already taken
3. If you see “too many attempts”, wait 15–60 minutes and try **once**
4. Ask an admin/developer to check Supabase **Authentication** → **Users** for stuck accounts

“An account with this email already exists”

- Sign in instead, or use **Forgot password**
- Or ask admin to remove a stuck Auth user, then register again

I forgot my password

1. Login → **Forgot password?**
2. Enter your email → send reset email
3. Open the **newest** email link (copy/paste into the **same browser** you use for the app if the mail app breaks the link)
4. Set and confirm a new password
5. Sign in

If the link only opens login and does not show “Set new password”:

- Request a new email (wait if rate-limited — see below)
- Make sure Redirect URLs are configured (developer task)
- Open the link in the same browser you use for the app

“Too many reset attempts” / email rate limit exceeded / 429

- Supabase’s built-in email is limited (about **2 auth emails per hour** for the whole project)
- Waiting and using a different email or network often **does not** help until the hour resets
- **Staff:** wait up to 1 hour, then try Forgot password **once**
- **Admin/developer emergency:** set a temporary password with the Admin API — see [Admin guide §2b](#)

Passwords **cannot** be viewed in the database or dashboard. Only a new password can be set.

Clock in / out

Clock in is blocked because of leave

- You have approved leave covering today
- Contact HR if that is a mistake

Location is required / GPS not working

1. Allow location permission for the browser or app
2. Turn on phone GPS / Location Services
3. Try outdoors or near a window
4. Refresh and try again

“Outside workplace” / too far away

1. Move closer to the office
2. Tap refresh on the distance hint (if shown)
3. Ask admin to check **Workplace location** pin and radius

I already clocked in today

- The app usually allows one attendance record per day
 - Use **Clock Out** if you are still working
 - Ask admin to check the attendance record if something looks wrong
-

Leave and claims

My leave/claim stays pending

- Waiting for admin approval is normal
- Ask your manager/HR to open Leave hub or Claims

I cannot upload a file

- Use a common type (image, PDF, etc.)
- Check file size and internet connection
- Try again on a stable network

Claim amount currency

- Claims are **MYR (RM)** only
-

Payslips

I see no payslips

- HR may not have an approved/paid payroll run yet
 - Ask admin to check Payroll
-

App feels slow

Scrolling Home feels heavy

1. Close other browser tabs
2. Pull to refresh once
3. Use Add to Home Screen instead of many open Safari tabs
4. Developer may need to check performance notes in the developer docs

Edge swipe back feels delayed

- Prefer the ← **back** button in the app bar
(on web/PWA, edge-swipe uses the browser and can feel slower)
-

Who to contact

Issue type	Contact
HR / leave / claims / payslip questions	Your manager or HR
App technical problems	Support phone +60 11-7078 7014
Database / deploy / admin role issues	Your developer

In Help & support you can **copy diagnostics** and share them when asking for help.
